**WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/US04/25682

**Box No. I Basis of this opinion**

1. With regard to the **language**, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ This opinion has been established on the basis of a translation from the original language into the following language \_\_\_\_\_ which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).

2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

☐ a sequence listing

☐ table(s) related to the sequence listing

b. format of material

☐ in written format

☐ in computer readable form

c. time of filing/furnishing

☐ contained in international application as filed.

☐ filed together with the international application in computer readable form.

4. Additional comments:

**WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY**

International application No.  
PCT/US04/25682

**Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

**1. Statement**

Novelty (N)	Claims <u>1-86</u>	YES
	Claims <u>NONE</u>	NO
Inventive step (IS)	Claims <u>33-60, 84-86</u>	YES
	Claims <u>1-32, 61-83</u>	NO
Industrial applicability (IA)	Claims <u>1-86</u>	YES
	Claims <u>NONE</u>	NO

**2. Citations and explanations:**

Claims 1-32 and 61-83 lack an inventive step under PCT Article 33(3) as being obvious over Mathis (6,599,314). Mathis discloses tube 100, wherein the passageway within the tube 100 is obviously a cavity. As to claim 61, for example, it would have been obvious to use a self-sealing membrane with the tube 100 since such membranes are old and well known.

Claims 33-60 and 84-86 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the combination of an outer tubular member with grooves and tracks having tabs slidably coupled therein.

Claims 1-86 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
